

Summary Prospectus | October 31, 2023

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, reports to shareholders, and other information about the Fund online at <https://www.brownadvisory.com/mf/tax-exempt-sustainable-bond-fund>. You may also obtain this information at no cost by calling (800) 540-6807 or by sending an e-mail request to [mutualfunds@brownadvisory.com](mailto:mutualfunds@brownadvisory.com). The Fund's Prospectus and Statement of Additional Information, both dated October 31, 2023, are incorporated by reference into this Summary Prospectus.

**Investment Objective**

The Brown Advisory Tax-Exempt Sustainable Bond Fund (the "Fund") seeks to provide a high level of current income exempt from Federal income tax by investing primarily in intermediate-term investment grade municipal bonds while giving special consideration to certain sustainable investment criteria.

**Fees and Expenses**

The following table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<b>Shareholder Fees (fees paid directly from your investment)</b>	<b>Institutional Shares</b>	<b>Investor Shares</b>	<b>Advisor Shares</b>
Maximum Sales Charge (Load) imposed on Purchases (as a % of the offering price)	None	None	None
Maximum Deferred Sales Charge (Load) imposed on Redemptions (as a % of the sale price)	None	None	None
Redemption Fee (as a % of amount redeemed on shares held for 14 days or less)	1.00%	1.00%	1.00%
Exchange Fee (as a % of amount exchanged on shares held for 14 days or less)	1.00%	1.00%	1.00%

<b>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)</b>			
Management Fees	0.30%	0.30%	0.30%
Distribution and Service (12b-1) Fees	None	None	0.25%
Shareholder Servicing Fees	None	0.05%	0.05%
Other Expenses	0.15%	0.15%	0.15%
<b>Total Annual Fund Operating Expenses</b>	<b>0.45%</b>	<b>0.50%</b>	<b>0.75%</b>

**Example**

The example below is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of each period. The example also assumes that your investment has a 5% annual return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
<b>Institutional Shares</b>	\$46	\$144	\$252	\$567
<b>Investor Shares</b>	\$51	\$160	\$280	\$628
<b>Advisor Shares</b>	\$77	\$240	\$417	\$930

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the portfolio turnover rate for the Fund was 111% of the average value of its portfolio.

## Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of the value of its net assets (plus any borrowings for investment purposes) in fixed income securities the interest of which is exempt from Federal income taxes, that do not subject shareholders to the federal alternative minimum tax (“AMT”), and that have either a bond issuer or a use of proceeds of the bond issuance that satisfies the Fund’s sustainable investment criteria, together the “Investment Criteria” of the Fund. This 80% policy cannot be changed without shareholder approval. The Fund may invest up to 20% of its assets in securities that may fully subject shareholders to Federal income tax, including the AMT. In addition, all capital gains are subject to Federal and state taxes. The Fund is non-diversified, which means that it may invest a significant portion of its assets in the securities of a single issuer or small number of issuers. The Fund may also invest more than 25% of its total assets in municipal bonds that are related in such a way that an economic, business or political development or change affecting one such security could also affect the other securities (for example, securities whose issuers are located in the same state). Certain of the fixed income securities that the Fund may invest in are often referred to as “labeled bonds.” Labeled bonds include, but are not limited to, “Green Bonds”, “Social Bonds”, “Sustainability Bonds,” or “Sustainability-Linked Bonds”.

Under normal conditions, Brown Advisory LLC (the “Adviser”) seeks to achieve the Fund’s investment objective by investing in municipal securities issued by states, U.S. territories, and possessions, U.S. Government securities, general obligation securities and revenue securities, including private activity bonds. Municipal securities include state and local general obligation bonds, essential service revenue issues (principally, water and sewer, transportation, public power, combined utilities and public universities), pre-refunded bonds and municipal leases. The Fund may also invest in private placements in these types of securities. Municipal leases are securities that permit government issuers to acquire property and equipment without the security being subject to constitutional and statutory requirements for the issuance of long-term fixed income securities. To enhance yield, the Fund may also invest in selective enterprise revenue and/or private activity issues. The repayment of principal and interest on some of the municipal securities in which the Fund may invest may be guaranteed or insured by a monoline insurance company (a bond insurer) or other financial institution. The Fund also may invest in other investment companies, principally money market funds.

The Adviser determines which securities to purchase by first evaluating whether a security falls within the credit guidelines set for the Fund by reviewing the ratings given by a Nationally Recognized Statistical Rating Organization (an “NRSRO”). Under the credit guidelines, the Fund will hold at least 80% of its total assets in investment grade municipal debt securities, as rated by an NRSRO when purchased, or if unrated, determined by the Adviser to be of comparable quality. The credit guidelines provide that the Fund may also hold up to 20% of its total assets in securities rated below investment grade by an NRSRO or, if not rated, determined to be of equivalent quality by the Adviser. Securities that are rated below investment grade by NRSROs are commonly referred to as “junk bonds.” Such lower rated securities and other municipal securities may become illiquid due to events relating to the issuer of the securities, market events, economic conditions or investor perceptions. If NRSROs assign different ratings to the same security, the Fund will use the higher rating for purposes of determining the security’s credit quality.

The Adviser then determines the appropriate maturity date and coupon choice after analyzing the current and targeted portfolio structure, and whether or not the issue is fairly priced. Generally, the average weighted effective maturity of the Fund’s portfolio securities will be between 4 and 10 years.

In determining the municipal securities in which the Fund may invest, the Adviser will use a process for researching securities for purchase that is based on intensive credit research and involves extensive due diligence on each issuer, state, municipality and sector relating to a municipal security.

The Fund may invest in derivatives instruments, such as options, futures contracts, including interest rate futures, and options on futures. These investments will typically be made for investment purposes consistent with the Fund’s investment objective and may also be used to mitigate or hedge risks within the portfolio or for the temporary investment of cash balances. These derivative instruments will be counted toward the Fund’s 80% policy to the extent they have economic characteristics similar to the securities included within that policy. The Fund intends to use the mark-to-market value of such derivatives for purposes of complying with the Fund’s 80% investment policy.

The Adviser utilizes sustainable investment analysis in connection with the Fund’s investments in fixed-income securities. As part of the research approach, the Adviser has a process to integrate, identify and consider the sustainable investment related risks and opportunities using a sustainable investment research assessment. The assessment may be conducted at the sector, issuer or security level. Not every investment will be covered at the issuer or security level. The Fund has access to this research and considers relevant sustainability issues. However, at the Adviser’s discretion, the Fund is permitted to make an investment without a written sustainable investment research assessment on file at the time of purchase, as long as the Adviser believes the security meets the Fund’s sustainable investment criteria.

The Fund’s sustainable investment criteria considers many factors including, but not limited to, any one or more of the following: clean and renewable energy, climate change and water conservation, efficient mass transit, innovative efficiency solutions, economic impact, access to affordable healthcare and community health promotion, access to education opportunities, stewardship of debt and capital, and board governance and transparency.

The outcomes of the Adviser's research may result in positive environmental and social impacts. While not a thematic fund, the nature of the Adviser's research considers sustainable investment themes, such as any one or more of responsible water management, accessibility of essential services like healthcare, transportation, education, and climate mitigation.

The Adviser pursues strategic engagement with issuers and other stakeholders in an effort to enhance due diligence and monitor the investment thesis.

In order to respond to adverse market, economic, political, or other conditions, the Fund may assume a temporary defensive position that is inconsistent with its investment objective and principal investment strategy and invest without limit in cash and prime quality cash equivalents such as prime commercial paper and other money market instruments. A defensive position, taken at the wrong time, may have an adverse impact on the Fund's performance. The Fund may be unable to achieve its investment objective during the employment of a temporary defensive measure.

### Principal Investment Risks

As with all mutual funds, there is the risk that you could lose all or a portion of your investment in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. The following are the principal risks that could affect the value of your investment:

- **Credit Risk.** The value of your investment in the Fund may change in response to changes in the credit ratings of the Fund's portfolio securities. Individual issues of municipal obligations may be subject to the credit risk of the municipality. Therefore, the issuer may experience unanticipated financial problems and may be unable to meet its payment obligations. Municipal obligations held by the Fund may be adversely affected by political and economic conditions and developments (for example, legislation reducing federal and/or state aid to local governments). Generally, investment risk and price volatility increase as a security's credit rating declines. Credit ratings are essentially opinions of the credit quality of an issuer and may prove to be inaccurate.
- **Debt/Fixed Income Securities Risk.** An increase in interest rates typically causes a fall in the value of the debt securities in which the Fund may invest. The value of your investment in the Fund may change in response to changes in the credit ratings of the Fund's portfolio of debt securities. Over the past several years, the Federal Reserve has maintained the level of interest rates at or near historic lows, however, more recently, interest rates have begun to increase as a result of action that has been taken by the Federal Reserve which has raised, and may continue to raise, interest rates, which may negatively impact the Fund's performance or otherwise adversely impact the Fund. Moreover, rising interest rates or lack of market participants may lead to decreased liquidity in the bond and loan markets, making it more difficult for the Fund to sell its holdings at a time when the Fund's manager might wish to sell. Lower rated securities ("junk bonds") are generally subject to greater risk of loss of your money than higher rated securities. Issuers may (increase) decrease prepayments of principal when interest rates (fall) increase, affecting the maturity of the debt security and causing the value of the security to decline.
- **Derivatives Risk.** The risk that an investment in derivatives will not perform as anticipated, cannot be closed out at a favorable time or price, or will increase the Fund's volatility; that derivatives may create investment leverage; that, when a derivative is used as a substitute or alternative to a direct cash investment, the transaction may not provide a return that corresponds precisely with that of the cash investment; that a derivative will not perform in the manner anticipated by the Adviser, which may result in losses that partially or completely offset gains in portfolio positions; or that, when used for hedging purposes, derivatives will not provide the anticipated protection, causing the Fund to lose money on both the derivatives transaction and the exposure the Fund sought to hedge. The risks of investing in derivative instruments also include leverage, liquidity, market, credit, operational and legal risks. Additionally, any derivatives held by the Fund will have counterparty associated risks, which are the risks that the other party to the derivative contract, which may be a derivatives exchange, will fail to make required payments or otherwise fail to comply with the terms of the contract. The Fund potentially could lose all or a large portion of its investment in the derivative instrument.
- **Interest Rate Risk.** An increase in interest rates typically causes a fall in the value of the fixed income securities in which the Fund may invest. Over the course of the past year, the Federal Reserve has been raising interest rates from historically low levels and may continue to raise interest rates. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Any additional interest rate increases may negatively impact the Fund's performance or otherwise adversely impact the Fund.
- **Investments in Other Investment Companies Risk.** Shareholders of the Fund will indirectly be subject to the fees and expenses of the other investment companies (principally, money market funds) in which the Fund invests, and these fees and expenses are in addition to the fees and expenses that Fund shareholders directly bear in connection with the Fund's own operations. In addition, shareholders will be exposed to the investment risks associated with investments in the other investment companies.

- **Liquidity Risk.** Certain securities held by the Fund may be difficult (or impossible) to sell at the time and at the price the Adviser would like. As a result, the Fund may have to hold these securities longer than it would like and may forego other investment opportunities. There is the possibility that the Fund may lose money or be prevented from realizing capital gains if it cannot sell a security at a particular time and price.
- **Management Risk.** The Fund may not meet its investment objective based on the Adviser's success or failure to implement investment strategies for the Fund.
- **Maturity Risk.** Generally, a bond with a longer maturity will entail greater interest rate risk but have a higher yield. Conversely, a bond with a shorter maturity will entail less interest rate risk but have a lower yield.
- **Municipal Securities Risk.** Changes in economic, business or political conditions relating to a particular state, or states, or type of projects may have a disproportionate impact on the Fund. Municipalities continue to experience difficulties in the current economic and political environment. National governmental actions, such as the elimination of tax-exempt status, also could affect performance. In addition, a municipality or municipal project that relies directly or indirectly on national governmental funding mechanisms may be negatively affected by the national government's current budgetary constraints. Municipal obligations that the Fund may acquire include municipal lease obligations, which are issued by a state or local government or authority to acquire land and a wide variety of equipment and facilities. If the funds are not appropriated for the following year's lease payments, then the lease may terminate, with the possibility of default on the lease obligation and significant loss to the Fund. The repayment of principal and interest on some of the municipal securities in which the Fund may invest may be guaranteed or insured by a monoline insurance company (a bond insurer) or other financial institution. If a company insuring municipal securities in which the Fund invests experiences financial difficulties, the credit rating and price of the security may deteriorate. The credit and quality of private activity bonds are usually related to the credit of the corporate user of the facilities and therefore such bonds are subject to the risks of the corporate user. The Fund may invest more heavily in bonds from certain cities, states or regions than others, which may increase the Fund's exposure to losses resulting from economic, political, or regulatory occurrences impacting these particular cities, states or regions.
- **Non-Diversification Risk.** Investment by the Fund in securities of a limited number of issuers exposes the Fund to greater market risk and potential monetary losses than if its assets were diversified among the securities of a greater number of issuers.
- **Non-Investment Grade ("Junk Bond") Securities Risk.** Securities rated below investment grade, i.e., Ba or BB and lower ("junk bonds"), are subject to greater risks of loss of your money than higher rated securities. Compared with issuers of investment grade fixed-income securities, junk bonds are more likely to encounter financial difficulties and to be materially affected by these difficulties.
- **Private Placement Risk.** The Fund may invest in privately issued securities, including those which may be resold only in accordance with Rule 144A under the Securities Act of 1933, as amended. Privately issued securities are restricted securities that are not publicly traded. Delay or difficulty in selling such securities may result in a loss to the Fund.
- **Rating Agencies Risk.** Ratings are not an absolute standard of quality, but rather general indicators that reflect only the view of the originating rating agencies from which an explanation of the significance of such ratings may be obtained. There is no assurance that a particular rating will continue for any given period of time or that any such rating will not be revised downward or withdrawn entirely if, in the judgment of the agency establishing the rating, circumstances so warrant. A downward revision or withdrawal of such ratings, or either of them, may have an effect on the liquidity or market price of the securities in which the Fund invests. The ratings of securitized assets may not adequately reflect the credit risk of those assets due to their structure.
- **Sustainability Policy Risk.** The Fund's consideration of sustainability criteria could cause it to make or avoid investments that could result in the Fund underperforming similar funds that do not consider such sustainability criteria.
- **Tax Risk.** Municipal securities may decrease in value during times when tax rates are falling. The Fund's investments are affected by changes in federal income tax rates applicable to, or the continuing federal tax-exempt status of, interest income on municipal obligations. Any proposed or actual changes in such rates or exempt status, therefore, can significantly affect the liquidity, marketability and supply and demand for municipal obligations, which would in turn affect the Fund's ability to acquire and dispose of municipal obligations at desirable yield and price levels.
- **Valuation Risk.** The prices provided by pricing services or independent dealers or the fair value determinations made by the Adviser may be different from the prices used by other mutual funds or from the prices at which securities are actually bought and sold. The prices of certain securities provided by pricing services may be subject to frequent and significant change, and will vary depending on the information that is available.

## Performance Information

The following performance information provides some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance of Investor Shares from year-to-year. The table shows how the average annual returns of Investor Shares for the 1 year and since inception periods compare to a broad-based market index.

Performance information represents only past performance, before and after taxes, and does not necessarily indicate future results. Updated performance information is available online at [www.https://www.browoadvisory.com/mf/funds/tax-exempt-sustainable-bond-fund](https://www.browoadvisory.com/mf/funds/tax-exempt-sustainable-bond-fund) or by calling 800-540-6807 (toll free).

### Brown Advisory Tax-Exempt Sustainable Bond Fund – Investor Shares Annual Total Returns

The Fund's calendar year-to-date total return as of September 30, 2023 was -0.78%. During the period shown in the chart, the highest quarterly return was 2.91% (for the quarter ended December 31, 2022) and the lowest quarterly return was -6.42% (for the quarter ended March 31, 2022).

### Brown Advisory Tax-Exempt Sustainable Bond Fund Average Annual Total Returns

For the periods ended December 31, 2022	1 Year	Since Inception (12/02/2019)
<b>Investor Shares</b>		
– Return Before Taxes	-8.81%	-1.44%
– Return After Taxes on Distributions	-8.87%	-1.58%
– Return After Taxes on Distributions and Sale of Fund Shares	-4.57%	-0.78%
<b>Bloomberg 1-10 Year Blended Municipal Bond Index</b> (reflects no deduction for fees, expenses and taxes)	-4.84%	0.03%

After-tax returns are calculated using the historical highest individual Federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In certain cases, the figure representing "Return after Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period, since a higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

## Management

Investment Adviser	Portfolio Managers
Brown Advisory LLC	Stephen M. Shutz, CFA, and Amy Hauter, CFA, have served as portfolio managers of the Fund since its inception in 2019.

## Purchase and Sale of Fund Shares

You may purchase, exchange or redeem Fund shares on any business day by written request via mail (Brown Advisory Funds, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701), by wire transfer, by telephone at 800-540-6807 (toll free) or 414-203-9064, or through the Internet at [www.brownadvisory.com/client-login](http://www.brownadvisory.com/client-login). Investors who wish to purchase, exchange or redeem Fund shares through a broker-dealer should contact the broker-dealer directly. The minimum initial and subsequent investment amounts for various types of accounts are shown below.

Type of Account	Minimum Initial Investment	Minimum Additional Investment
<b>Institutional Shares</b>		
– Standard Accounts	\$1,000,000	\$100
<b>Investor Shares</b>		
– Standard Accounts	\$100	\$100
– Traditional and Roth IRA Accounts	\$100	N/A
– Accounts with Systematic Investment Plans	\$100	\$100
<b>Advisor Shares</b>		
– Standard Accounts	\$100	\$100
– Traditional and Roth IRA Accounts	\$100	N/A
– Accounts with Systematic Investment Plans	\$100	\$100
– Qualified Retirement Plans	N/A	N/A

The minimum investment requirements are waived for retirement plans that are qualified under Section 401(a) of the Internal Revenue Code of 1986, as amended (“IRC”) and tax-exempt under Section 501(a) of the IRC, and plans operating consistent with Section 403(a), 403(b), 408, 408A, 457 or 223(d) of the IRC.

## Tax Information

It is anticipated that the Fund’s distributions will generally be exempt from Federal income taxes, including Federal alternative minimum tax. However, a portion of the Fund’s distributions may not qualify as exempt. Distributions attributable to taxable interest, dividends and all capital gains may be subject to Federal, state and Federal alternative minimum tax, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an IRA, and then you may be taxed later upon withdrawal of your investment from these tax-deferred accounts.

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a fund-supermarket), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
